

CLEANING & DISINFECTING GUIDELINES

CLEANING GUIDELINES

General Cleaning Guidelines for Rulon Products

To preserve the integrity and appearance of your Rulon ceiling and wall systems, please adhere to the following cleaning recommendations:

- *Use Only Mild, Clear Detergents:* Avoid dyed or harsh cleaning solutions, as they may permanently discolor or damage the finished product.
- *Clean Only the Visible Surfaces:* Cleaning should be limited to the visible, finished surface of Rulon products; the backs and non-visible areas do not require regular cleaning.
- *Do Not Saturate Panels:* Rulon products should never be soaked or exposed to excessive moisture.

Recommended Cleaning Method

Follow this 4-step process to effectively clean Rulon products:

- *Surface Preparation:* Clean the surface with a duster or microfiber cloth to remove loose dust or debris.
- *Cleaning Materials Preparation:* Dampen a clean, soft sponge or cloth with a mild, clear detergent.
- *Surface Cleaning:* Wipe the finished face lightly to remove surface dirt.
- *Drying the Cleaned Surfaces:* Immediately dry the surface using a clean, white microfiber cloth to prevent moisture-related staining.

DISINFECTING GUIDELINES

General Disinfecting Guidelines for Rulon Products

While many commercially available disinfectants exist, select industry-tested and approved products that are safe for repeated use without damaging or discoloring Rulon products are suggested on the following page. When disinfecting Rulon products, follow these important precautions:

- *Use Only Clear Disinfectants:* Avoid dyed or harsh disinfectants, as they may permanently discolor or damage the finished product.
- *Disinfect Only the Visible Surfaces:* Disinfecting should be limited to the visible, finished surface of Rulon products; the backs and non-visible areas do not require regular disinfection.
- *Do Not Saturate Panels:* Rulon products should never be soaked or exposed to excessive moisture.
- *Follow Manufacturer Safety Instructions:* Always use appropriate personal protective equipment—such as gloves and eye protection—as recommended by the manufacturer of the cleaning agents and tools.

DISINFECTING GUIDELINES

General Application Methods for Rulon Products

To maintain the appearance and integrity of Rulon ceiling and wall systems, it's important to use disinfecting products that have been industry-tested and verified for compatibility with our finishes. The table below outlines recommended and non-recommended application methods:

PRODUCT	FOG		SPRAY		WIPE	
	Shockwave™ 2 oz/gal	Morning Mist™ 2 oz/gal	Bleach 0.12%	Morning Mist™ 0.085%	Morning Mist™ 0.085%	Hydrogen Peroxide 3%
